

Derik A. Linch

I write, speak and build cool things.

Projects

Skyffel: Peer to peer shoveling services application. Built the entire application in about four days. Extensive routing and payment integration.

- MEAN+Postgres, Stripe Payments, Google Embed API

Didgeridone: A task application with geo-location enabled notifications.

Worked primarily on the backend API, database integration, and the web-app.

- RESTful API, Google API, ngAnimate, ngSanitize, inline-text editing

Dander: A discovery engine for adoptable dogs. Like dogs and contact their shelter. Worked primarily on backend API and database integration.

- RESTful API, Petfinder API, significant Promise chaining

Bracketer: Create randomly sorted tournament brackets. Single-page app using only front-end technology. Built entire project by myself.

- JQuery, event-handlers, Bootstrap, flexbox

BookToRead: API endpoint to search for award-winning Sci-Fi books. Returns JSON of books based on URL endpoint parameters.

- Cool SQL statements, Postgres, KnexJS, Data-modeling, ExpressJS

Experience

CannaBuild: Director of Sales

- Helped create initial sales flow for the company and signed some of our first customers and refined the product.

Spire Digital: Account Executive

- Agency and modern software exposure. Significantly built my sales/interpersonal skills

Freshplum: Business Analyst

- Biz dev in San Francisco for a Y-combinator/Google Ventures backed startup

Education

Galvanize - Fullstack Immersive Web Development

- MEAN, emphasis on common software architecture, significant time was spent delving into "unfamiliar technologies" and most of all, learning how to learn. I led a Cover Letter workshop for my classmates.

CU Boulder - BA Economics 2013

Certificates: Entrepreneurship, Advertising

Cool

GoCode Colorado - Challenge Weekend Winner - 2014

LaunchUR - Mentor - 2013

NASM - Certified Personal Trainer - 2014

CU Student Government - Exec Council, UMC Board - 2013
